

DELIVERING SUPERIOR PERFORMANCE

ENGINEERED METALWORKING FLUIDS

Excel Metalworking
Fluids

Eastern's Excel line of metalworking fluids provides you with the highest-quality, specially formulated products that deliver performance and value. But you get even more. The Eastern Advantage – it surrounds every product you order with services designed to help your bottom line: Tech Support from our in-house Technical Services Department; Sampling & Analysis to ensure your fluids, lubes and coolants are at peak performance; On-site Training to help your team better manage fluids and lubes; and much more, all focusing on lowering repair and replacement costs and downtime.

HERE ARE SOME OF THE QUALITY METALWORKING PRODUCTS AND SERVICES WE OFFER:

ExcelCool Machining and Grinding Coolants

ExcelCool Eastern's ExcelCool line of machining coolants include water soluble, semi-synthetic, and synthetic products. ExcelCool products are intended to be diluted with water, and are ideal for general machining applications, including broaching, cutting, drilling, hobbing, milling, punching, reaming, sawing, tapping, threading and grinding.

ExcelCut Machining and Grinding Oils

ExcelCut Eastern's ExcelCut straight oil products offer an advanced quality combination of mineral oils and additives. ExcelCut products are intended to be used neat, and are ideal for machining applications including broaching, cutting, drilling, hobbing, milling, punching, reaming, sawing, tapping, threading and grinding.

ExcelClean Maintenance and Production Cleaners

ExcelClean ExcelClean line of maintenance and production cleaners are suited to meet a variety of cleaning applications, including degreasing, parts washing, system and maintenance cleaning.

ExcelDraw Forming Fluids

ExcelDraw Eastern's ExcelDraw line of forming fluids is the first name in cutting-edge metalworking performance. These quality drawing lubricants include straight oils, soluble oils, emulsions and full synthetics, and are ideal for all forming applications, such as stamping, drawing, blanking and tube bending.

ExcelGuard Anti-Corrosion Fluids

ExcelGuard The ExcelGuard line of anti-corrosion fluids provides top-of-line rust prevention and corrosion protection for machining systems and manufactured parts. ExcelGuard products include synthetics, soluble oils, straight oils and solvent blends.
